HARD FEELING DEVELOPED.

Maryland Delegation Splits on an Administration Appointment.

The conference of the Maryland delegation with Senator-elect McComas last night, regarding the Federal officers in Maryland, did not result in an agreement. Senator Wellington was not present, and in his absence it was decided that no formal action should be taken. A practical understanding was, however reached regarding all the officers except that of usual officer, and over that there is likely to be considerable controversy.

Senator-elect McComas presented State Chaleman Scott as his candidate, and Representative McIntire indersed William T. Henderson as his candidate. It developed that there is a fight against the Administration in the delegation. Senator Hanna has indorsed Henderson and Representatives Barber and Baker sup-

port Mcintire's light for Henderson. Representatives McLionald and Booze are with Secutor-elect McComas, against

given to Stone for collector and probably to J. B. Hanna for surveyor of the port. Mr. Mudo's district will get the district attorneyship and the vacant customs aperships for which he named Joseph H. Ching of Leonardiown, and suggest-ed John C. Rose and Snewden Hill for the district atterneyship.

the district afterneyship.

There was no opposition to the appointment of William F. Avery as marshal. These agreements were only reached after a long contest.

The postmastership was not discussed.

Another conference will be held today, when it is expected a final agreement will be reached. There was no especial friction tast night except over the candidates for naval officer, which developed a good deal of hard feeling. Crucity to Animals.

Perry Brodius, colored, was fined & in the Police Court this morning by Judge Scott for cruelty to animals. The specific charge, was overloading. Whooping Cough.

I had a little boy who was nearly dead from an attack of whooping cough. My from an attack of whosping cough. My neighbors recommended Chambertain's Cough Remedy. I did not think that any medicine would help him, but after giving him a few doses of that remedy I noticed an improvement, and one bottle cured him entirely. That somewhat ancient complain mong the knights of the diamond, ina among the knights of the diamond, ma-bility-to-hit, was the prime cause of the Senutors' shut out by the Bostons at National Park yesterday. Kid Nichols was in the points for the visitors and pitched a superb game, allowing but seven hits off his delivery. The Bean-caters put up a perfect fielding rame, and only two of the locals reached the econd base.

Weyhing was touched up pretty lively by the Hoston lads, and the support accorded him in the field was far from the gilt-edge game put up by the Senators on Saturday last.

Through the courtesy of Manager Selce, of the champions, today will be a special "ladies" day," and a large crowd will no doubt take advantage of the occasion to witness the game today, as it will be the last one at National Park this week.

To Remove Bronchitis, Catarrh, Consumption and Pneumonia

From the List of Dangerous Dis-

eases Is the Education of

the People, Ever since the discovery that catarrh, bronchitis, pneumonia and consumption were purely local diseases, caused by the presence of bacilli in the air passages, the medical profession throughout the whole world have bent all their energies to finding some method or remedy by which these bacilli could be reached and which these bacilli could be reached and destroyed. How they have succeeded is best told by a glance at the reports published by the different boards of health in all the large cities in this country, which show not only a great increase in the number of deaths yearly from these diseases, but a startling growth in the number of persons afflicted. This failure to find a cure for diseases of the respiratory organs must not be construed to to find a cure for diseases of the respiratory organs must not be construed to mean a lack of ability on the part of the medical profession, for they have discovered many remedies which would kill these germs. Yet, strange to say, not one of them could be conveyed to the parts affected by dry air. It can be readily seen, then, that the discovery of "Hyomet," a germicide of sufficient power to kill at once the bacilli of these diseases, and at the same time volatile enough to impregnate every particle of air breathed impregnate every particle of air breathed impregnate every particle of air breathed by the patient, yet leaving it free from moisture, was one of vital importance to the medical world. Doctors throughout the whole country began to test the effi-cacy of this new remedy and now, after two years' trial in hundreds of cases un-der their own care, over 2,800 physicians claim that "Hyomet," the Australian Dry Air Cure is the only treatment by which Air Cure, is the only treatment by which all the diseased parts of the respiratory organs can be reached and cured. Furthermore, it is claimed that in fami-lies who are predisposed to catarrh and consumption, if the fathers and mothers

will but instruct their children in the use of "Hyomel," the rising generation will be freed from those dread diseases. It would seem, then, that nothing remains to be done in order to remove these diseases from the list of dangerous ones but to teach the people the value of "Hyomet".
